Title: Net Profit Share Payments for Outer Continental Shelf Oil and Gas Leases, 30 CFR 220.

OMB Approval Number: 1010-0073

Abstract: Companies involved in the exploration and development of Outer Continental Shelf oil and gas leases under the Net Profit Share Lease (NPSL) system make net profit share payments rather than royalty payments. To encourage exploration and development of a lease, the NPSL system provides for a sharing, by the lessee and the Government, of the risk involved. The lessee is permitted to deduct allowable costs to determine net profit, and profit share payments are not due until the lease becomes profitable. Lessees are required to maintain an NPSL capital account and to provide annual reports listing costs incurred, credits received, and the balance in the account. Beginning the first month in which production revenues are credit to the capital account, lessees are required to prepare monthly reports showing volume and disposition of oil and gas production, production revenue, all costs and credits to the account, the balance in the account, and the net profit share payment due the Government.
